Comments: To whom it may concern.

I hope my voice will speak for the horses. I do not support the thinning of the herd. I understand herd management, but to thin a herd so dramatically that it weakens the structure to point of depletion and competing for genetic strength is going to be a downfall for the herd in a whole. When you have thousands upon thousands of acres of property this is a selfish act. Let them be and preserve them for our future generations to be able to appreciate. I hope my voice is heard in representation of the horses. Thank you.
