Comments: Why are the horses being limited to a 21 square mile area? If I understood the article correctly, this reserve covers an approximate 4800 square mile area. How much of this land is being leased for grazing cattle and how much has the amount of land leased for grazing increased over the last ten years? What is the land that is not designated for the horses being used for? How many horses currently occupy the land designated for the horses? The horses have a little over 13,000 acre, the remaining area covers over 3,000,000 acres, what is being done with it?
