Comments: I do not agree with or approve the so-called management plan for the Heber wild horses. Removal and destroying healthy, animals because they are "in the way" is so very wrong. Fencing them into a small % of the forest area is next to abuse. These herds have always been free roaming. That's who they Are! This is an artificial way to make the appearance of overpopulation and you know it.

I am sure that the people who live near them are very angry with your plan. I know one family (friends) that is outraged by this plan.

I am asking that you reconsider how you deal with the contrived "problem" in the Heber Wild Horse Territory.
