Comments: To whom it may concern: I am just a person who is concerned about the welfare of these horses I am an animal lover, so of course there has to be another way to deal with the situation, other than putting them down. Can't you auction them off, or try to give them homes? Also cutting their land down, is inhumane. These are wild horses they need room to run, haven't we taken enough away from them, and all the other animals as well?? I live in Big Bear, there are no bears here any more because we have taken all their land and pushed them out. Are we going to do the same with these horses? It won't be long until all our animals will be extinct. I think this world would be a sad one without our animals. Please try and save these horses and their land, they deserve at least that. Thank you for your time, Molly
