First name: Bill

Last name: Wolf

Organization: Colorado State Forest Service

Title: Forester

Comments: We fully support this proposed action. There are heavy, continuous fuels around and leading right down into the Peak 7 neighborhood that pose a dangerous hazard. Having the opportunity to implement a mosaic of Clearcuts, Patch Clearcuts, and Thinnings will reduce the intensity, impact, and risk of wildfire to the Peak 7 neighborhood and firefighters. This proposed action will allow forest managers to mitigate these hazardous fuels conditions even though the units have not reached the original 60% mortality threshold.
