Comments: I am commenting on the scoping letter for Cascades Lake Highway Scenic View Corridor. The proposal is to close all camping in this designated area. This area is where many visitors dispersed camp as is close to town for them to spend money in town and partake of various recreational activities. For years I have slept, not camped as in never making a fire or setting up a temporary camp in the proposed closed area. My observation of other users over many seasons of visiting is of clean camping areas. I have noticed evening partiers partying and leaving litter and destruction behind, these are not the people the order will address. This potential order banning camping would not stop the non camping abusers. Primitive camping spots are well back off the highway which eliminates the fast driving public from seeing. Closing this area to camping will drive the camping visitors further away from town to already overcrowded USFS paid campsites way up the highway. The intent of banning dispersed camping lumps most of us responsible environmentally kind campers with the non camping destructors. Management should be directed at the partiers who leave their effects but don't spend the night. As for campfires this area could be designated a no fire area.

My interest is for myself and the many other responsible dispersed primitive campers.
