Comments: Please practice sound stewardship and stop any plans to round up or diminish the numbers of Heber Wild horses. The American public loves their wild horses and has entrusted their care to you. Stop the round ups. Stop the wasteful use of tax payer money. Stop the loaning of our public lands to the cattle lobbyists at the expense of these amazing horses.

You can do better than roundups and dirt pens. You MUST do better. Let's come up with a plan for sharing the land and protecting all of its creatures (and treating them with the respect and honor they deserve). How about starting a sanctuary and becoming a model of humane darting fertility control and letting the horses run free with their families? Thank you for remembering the law of nature: we are all connected and we have been given an amazing gift of nature to treasure, not destroy!
