Comments: Ranchers already have too much power and studies have shown that the horses are not stealing grazing land from them. They feel entitled to use public land for their private businesses and feel any wildlife in their way should be killed. This herd has already had 20 killings by locals since 2018. Please stop catering to the ranchers and support the wild horses who are supposed to be protected under the Wild and Free Roaming Horse and Burros Act. Will you allow every wild horse to be rounded up or sent to slaughter? What a thank you for the animal that helped build this country, pulled the plows, hauled the migrations, pulled the fire wagons, went into battle with us. And now what? Throw them away because a certain industry falsely says they are inconvenient?
