Comments: Where is the proof that this herd exceeds range capacity?

Why can't horses over 10 or animals you deem unworthy go to a horse sanctuary verses a kill buyer?

Here's the thing: everyone loves wild horses. They are our heritage. If you reduce their number to where they are genetically unviable, you are murdering a piece of history. You are robbing future generations of the unique experience of wild horses.

Please don't. Let them run free.
