Comments: I am a native of AZ for 53 years, and love this state and its WILDLIFE. That being said the horse on Sitgraves Forest are not WILD horses they Fort Apache Indian Reservations LIVESTOCK abandon from there reservation. The Indian Members from that reservation opened gates allowing the horses to access our public lands. They where having a population problem and new if they let the horses leave the RES. it would help with there over population. Horses are INVASIVE species not NATIVE, Domestic in there original access to the united states. I think the forest service new plan of reduction in the herd is a GREAT idea, I support it a 100% A feral horse is a free-roaming horse of domesticated ancestry. As such, a feral horse is not a wild animal in the sense of an animal without domesticated ancestors.
