Comments: It is Very Important that we keep the WILD HORSES AND BURROS SAFE AND FREE!

It is Not the Wild Ones that are causing any damages to the Public Lands that by over grazing. The overgrazing has become an issue because of the larger herds the Rancher raise! They are raising larger and larger herds so they make more money! Those domestic herds are the ones that need to be cut back! Cut them back to what their own private land can handle and I promise you that by doing that and leaving OUR WILD ONES ALONE, you WILL see the land improve in just a few short years!!! OUR WILD ONES SHOULD NOT BE LIMITED TO THE VERY SMALL AREA OF LAND YOU DESIGNATE FOR THEM!! THEY SURELY WILL STARVE AND BECOME SICK AND DIE!! When I was growing up we had 10 acres and had 4 horses. We suplimited grains All year round and had to Buy hay to feed during winter and early spring! Our Domestic horses managed fine but we are talking of the Wild Ones. THEY have learned to survive. Under the Harshesht conditions and still stay in physically good conditions. They need to roam FREE and WILD in THEIR HABITAT! PLEASE! I KNOW IF YOU WILL JUST TRY THIS FOR A FEW YEARS YOU WILL SEE THE LAND IMPROVE BEYOND BELIEF. KEEP OUR WILD ONES SAFE, FREE AND WILD!! ALL LIFE MATTERS!!
