Comments: At a time when our wild lands are under constant threats from development and climate issues, we need to vigorously protect the land and the wildlife and plants we have left. I urge you to do the following:

Designate all Inventoried Roadless Areas as non-motorized;

Manage Recommended Wilderness as true wilderness in order to preserve their changes for future designation;

Include an objective that removes all unnecessary roads over the life of the forest plan; and

Establish standards that truly protects fish and wildlife, and restores and connect their habitat.

Thank you,

Kenneth Mundy
