Title:

Comments: At this time the protection of our forests, deserts, rivers, lakes and recreation areas already under too much of an attack.

Consider that the Tonto National Forest, is home to 9 threatened and endangered species plus many other species; its forests, deserts, rivers, lakes and recreation areas are part of our heritage and need to be preserved. to ensure our health and welfare and that of our descendants.

All of our remaining natural, in particular the Tonto National Forest need to be preserved as they are.

I f they cannot be preserved as they are any changes the Forest Service must:

Designate all Inventoried Roadless Areas as non-motorized.

Manage Recommended Wilderness as true wilderness in order to preserve their changes for future designation;

Include an objective that removes all unnecessary roads over the life of the forest plan; and

Establish standards that truly protect fish and wildlife and restore and connect their habitat.

Please do this for the sake of us, our descendants, the country and the planet.

Thank you
