First name: Patricia

Last name: Copenhaver

Organization:

Title:

Comments: All vehicles, off road or otherwise, should remain off limits to Tonto National Forest. We have a duty to protect our national forests and parks for future generations. In addition, these old forests are carbon sinks, sucking the carbon out of the atmosphere. They are our last best defense against the effects of climate change. Your proposed plan will destroy the ecosystem and kill humanity. It may take a while but we won't last more than a couple of decades, at most.
