Comments: Hello,

This is a real concern for this community and I see it tarring a community apart. Breaks my heart! I've had a family cabin up here since 1993 and now a permanent resident. I've witnessed how this community can stand together and support one another during the fire of 2002. This was one of many reasons why I decided to purchase a home and live here permanently.

Now I'm concerned!

I'm sure you have reached out to other states with the same issues. I hope you consider both sides, research every possible solution, look at what has worked and hasn't for other communities across the country.

Thank you for taking the time to read this and I hope a solution (WITHOUT Euthanizing these BEAUTIFUL creatures) is met. I feel the issue only caused a concern when the horses started getting murdered. Maybe a Stricter fine if someone is caught.?
