Title:

Comments: I strongly urge the U.S. Forest Service to consider the following:

1. Designate all Inventoried Roadless Areas as non-motorized;
2. Manage Recommended Wilderness as true wilderness in order to preserve their changes for future designation;
3. Include an objective that removes all unnecessary roads over the life of the forest plan; and
4. Establish standards that truly protect fish and wildlife and that restore and connect their habitat.

The approval of recreation vehicles to be operated in national forest areas is really misguided.

The natural serenity and pristine experience that park users expect is sullied by the presence of these abominations and noise plus pollution makers.

Please do all you can to preserve and protect, not defile.

Thank you.
