Comments: One of my many concerns comes from the statement on page 13 Stating "The Deciding official for the ASNF Heber Wild Horse Territory Management Plan will be the forest supervisor. In view of the recent change with Steve Best's leaving his position as supervisor I feel strongly that this statement needs to be removed as well. Steve Best's peculiar departure during a very important phase of the forest plan with apparently no replacement found AS OF YET creates this request. Since there is no one staffed as his replacement at this time other than Madrid acting in place who also has no history in this forest which indicates that he would also not have the knowledge base to be in the position to be consider a candidate to make these very detailed and important decisions

The likely hood of the replacement appointee coming in with little to no knowledge of the ASNF much less the history that surrounds the issues at hand it is my desire to see the statement removed before this plan moves forwards.
