Title:

Comments: The Tonto National Forest is a unique and precious home to 19 threatened and endangered species, and 50 species of conservation concern. Tonto Forest should be granted the strongest protections possible, including:

- * Designate all Inventoried Roadless Areas non-motorized;
- * Manage Recommended Wilderness as true wilderness in order to preserve their chances for future designation;
- * Include an objective that removes all unnecessary roads over the life of the forest plan; and
- * Establish standards that truly protects fish and wildlife, and restores and connect their habitat.

Thank you.
