Title:

Comments: Attn: Heber wild Horse Territory, This is so wrong you to to take them off of taxpayers land . Putting cattle out there . That is what this is all about . You say there to many out there when they are being kill out there . There is no over Abundance of wild horses out there . When the last time you counted? The they have been managed just fine the way they are . So I oppose removal of horse reduction to there habitat . I oppose of boundary fence they should have the right to move around free. I support SRWHMG's fertility control program , Humane reduction of Horses over 10 years without remover of them . There should be overpass at location where they are familiar with so they can cross there . You need Humane Management that state Laws and people who live there . That protects these wild horses. That work so hard to protect them . Get the cattle on there own land .
