Comments: 1. Heber wild horses are not overpopulated, please do not lie to public about this matter. They were borned on this public land , this is their home,we , the taxayer's have to spend millions of money rounding up wildhorses which I do not want to spend a Penney for this, it is good to have wildhorses for ecologically ,grass's, also prevent wildfires I hope you know those things with respect. Under the 1971 the wild free roaming horses and burros act, they shall be protected, I disagree slaughtering Wildhorse and burros 100% 150,000 horses were slaughter each year This Must STOP and We need investigate who is behind these crime against innocent horses and burros, We have huge acreage of public land, so we can enjoy and see wildlife when we go travel. I do not want to see cows grazing our public land and destroy our ecosystems and water supplies. Thank you
