Comments: Please do not limit wild horse range to 21 sq miles. First the forest service must PROVE there is too high a polulation of horses. And then prove that the existing population is creating a problem, then look at the problem if one is there and look for a reasonable solution. I ride up there once in a while as do many. We rarely ,very rarely see wild horses, or horses of any kind. What I do see, is hundreds of cattle. Find a better solution. This just seems like a boon to cattle ranching to the detriment of all else, deer, elk, horses and burros
