Comments: as long as we are continuously going to have wars on land for grazing, the proper thing to do is to only allow domestic horses just like we did the dogs. horses have a very hard short life out in the wild. there is no purpose served to human beings in having wild horses. they are either pets or food just like cattle. they do not need to be roaming wild. we don't allow homeless wild dogs, why do we allow homeless wild horses? just some common sense. stop the breeding of all pets and none of them will be suffering. if the pet dose not have a job or family there is no reason for it to be produced.
