Comments: While I understand that there COULD be an issue with range rights..
I see the 1st problem.. These horses were here BEFORE the ranchers!
If you can't find a simple solution (other than killing the horses)... get out of the business!
Now on to a solution... if the horses can't be adopted out, capture them, spay and/or neuter the horses (get a Vet to donate the work and such...can you say tax deduction??) Then turn them back out...the heard with thin itself.
Who...in their right mind can sanction such murder? These horses aren't "garbage" to be just disposed of! If some involved weren't do damned greedy, they would be able to see other solutions other than wanton or systematic killing of part of or western history... SHAME on those who do this, and in the end, we all answer to our maker for our wrongs...
