Comments: To any proud American the wild horses of the West represent our drive and determination to settle this country. The country could not have been settled on foot. Wars would not have been won on foot. Commerce would not thrive on foot. These wild horses are our the most underserved endangered animals in the country. It's very hard to comprehend why they are not at the top of the list to protect.

I may live out of AZ but in my state the last wild herd is under attack and unnecessary roundups. I have to look to other states to try and help.

Thank you for your time
