Title:
Comments: These horses were born in the wild, leave them in the wild. What right do ranchers from other neighboring states to take our natural resources and destroy them so their cattle came come here and use our land. Leave the horses alone and leave your cattle on your land in your own states, feeding off your land. There were laws past in the past, leave them that way. Just because you have more money than we do doesn't give you the right to do this to our beautiful horses.
