First name: Maria

Last name: Castro

Organization: Jackson's Rescue and Horse Ranch

Title: Barn Manager

Comments: Instead of building a cheap ass wall. Why don't we take that money and the money congress wants to take from the social security funds and help manage the wild horses that represent part of our American Heritage and build quarentine facilities and rescue facilities so the rest of us can work this situation into our budgets and rehome what the government is going to cull. I can't stumble onto another video where baby horses are getting trampled cuz the herd is scared. Horses have served with us in wars!!! Horses have helped protect our homes and way of life. They have been at our side since time immemorable. So lets show some respect and take care of them and at the very least find homes for them and no more sending them to slaughter and no more having the babies teampled please.
