Title:

Comments: I am opposed to the transmission lines for the adverse effect they will have on the Town. The one thing Minturn has going for itself is its natural surroundings and destroying or changing these resources will be a tragedy.

By not burying the lines, the Town will forever be scarred and mostly for the benefit of Vail, Avon and the surrounding communities.

As a Minturn resident looking out for the benefit of the whole community, I am one who wants to play nice in the sandbox. However, current and former council members of both Vail and Avon are not even aware of this issue. They don't even know they have issues or they are "vaguely familiar with the issue. It's not on their radar. They don't even know they are playing in a sandbox where Minturn has the tools to make the sandcastle.

If Vail and Avon representatives become aware of the electrical issue they have, they have the money and resources to bury the line all the way through our small town.

NO WAY do I want to walk next to giant electrical poles when I go out for a walk to Two Elk.
