Title:

Comments: The Tonto National Forest is home to 19 threatened and endangered species, and 50 species of conservation concern. Please give the Tonto National Forest the strongest protections possible. Also keeping or extending to the greatest range as possible.

Please Designate all Inventoried Roadless Areas as non-motorized, manage Recommended Wilderness as true wilderness in order to preserve their chances for future designation;

Include an objective that removes all unnecessary roads over the life of the forest plan; and

Establish standards that truly protects fish and wildlife, and restores and connect their habitat.

Please choose the health of this ecosystem and thereby the planet over short-term profits for a few. They might seem like profits now but it will only further contribute to the destruction of our planet and ourselves.
