Title:

Comments: Please have compassion for the horses, and all animal and human life.

Horses have served mankind for thousands of years, In wars, farms, entertainment, Food, every and any place.
All horses deserve compassion.

As far as farmers go with their need to use public land for their cattle etc, it not right to deprive any other creature so that you can make a profit on public land.

Most intelligent people are becoming vegetarians anyway. The pollution cows, sheep, chickens etc make in the air, land and lakes is abhorring !!

Also most farm animals are abused, tortured, without compassion. Not good.

There should be ae law as to who has rights.
