Title:

Comments: I frequent the Salt River for tubing, kayaking throughout the summer. I am extraordinarily irritated and dismayed regarding the horridly ugly fencing that was put up along the Salt this winter. I also am horrified to learn that herbicides, which are known cancer causing are used near a recreational water source. I want to be informed and consulted when the use of my tax dollars are buying poison to toxify public use lands. My grandfather died of cancer induced through years of herbicide use on his farm and I absolutely am disgusted that these are used in public use recreation areas. I also am bitterly disappointed to find out that the Salt River Horses have been relocated up stream due to your ugly fence. How could you? And without discussing it w the public? Unacceptable. We pay for these things, YOU should be consulting ME.
