Comments: This plan will decide how all aspects of the Tonto's 2.8 million acres of forests, deserts, rivers, lakes and recreation areas will be managed for decades to come. The Tonto National Forest is home to 19 threatened and endangered species, and 50 species of conservation concern. Of course, the Forest Service under the Trump administration favors grazing, mining, logging and motorized wreckreation to the detriment of numerous fish and wildlife species. Inventoried Roadless Areas and even the few places recommended for wilderness protection will be vulnerable to off-road vehicles. Please grant the Tonto the strongest protections possible:

Designate all Inventoried Roadless Areas as non-motorized;

Manage Recommended Wilderness as true wilderness in order to preserve their chances for future designation;

Include an objective that removes all unnecessary roads over the life of the forest plan; and

Establish standards that truly protects fish and wildlife, and restores and connect their habitat.
