Title:

Comments: Wild horses are part of this country's heritage and deserve every protection. They cannot be replaced. The herds are being exploited and inhumanely treated as a whole. The Heber herd should not be managed by a single individual. Proper management of the herd should be handled with input from groups with expertise in management of wild horses. I am speaking for the horses which cannot speak for themselves. Protect the Heber herd. Protect and respect all wild horses. Do the right thing.
