Title:

Comments: I love the Tonto and visit as often as I can. I was once sitting at an overlook and a dirt bike roared up and nearly hit me! My goal of experiencing the solace of nature it was not.

Motorized use should take a backseat to quiet uses and habitat and resource protection. Please preserve roadless areas and habitat connections.

Unnecessary roads should be removed and Wilderness strictly protected.

You set the standard and provide the environmental education about why. Even a gear head may thank you one day when they have the chance to turn the motor off and connect with nature. Thanks.
