Comments: Simple message. Protect the Salt River horses realize what we all do every day will impact them positively or negatively. Do any of us really want it on our heads that we destroyed or harmed in a species in some way shape or form instead of preventing or protecting Please listen to Salt River wild horse management group and their ideas and ways to manage and care for all herds. Do the right thing these lives depend on it and we as people are in charge of managing all life in the very best and a humane way. Every living thing has the right to be here just like us humans. I love and support Salt River Horses and I love and support all life in as much of capacity as I am able. Please won't you all do the same.
