Comments: I feel with further investigation and research a great plan to leave these horses alone can be accomplished. We all want the best solution! The easiest solution to remove these horses from their land will be the worst outcome for everyone especially the horses who most likely will end up shipped off to slaughter. These horses symbolize the freedoms that were and continue to make up the great United State of America. I know you will make the Right decision which will be a Win Win for everyone especially for the horses!
