Comments: (1) The Wild Free-Roaming Horses and Burros Act was signed into law by President Richard M. Nixon on December 18, 1971. According to the law the boundaries of the Heber Wild Horse Territory were to include all areas where free-roaming horses were found in 1971. The boundaries were also to include migratory patterns and the habitat needs of the wild horses. We know those boundary requirements were not included in the Heber Wild Horse Territory.

I would like the Forest Service to provide the information they used to determine how and why the Heber Wild Horse Territory was set up the way it was. And I would like the Forest Service to produce any and all scientific studies and surveys and other assessments that were used in how they determined the boundaries of the HWHT.

(2) Require the Forest Service to do a thorough Environmental Analysis of the forest that includes all wild species and domestic cattle.

(3) The Forest Service is proposing that the forest supervisor will be the only person to decide the fate of the Heber wild horses and their territory. I Object to any one individual being given complete power and authority over what happens to the Heber wild horse herd and their habitat. This is public land and is subject to laws and regulations & in no way should be based upon the opinion of one man!!

4) This land belongs to the PUBLIC and not to the cattle ranchers and the wild horses have every right there! and it should be managed to include them!!
