Comments: As an outdoorsman, I am in tune with nature and wild spaces and support all that is good for the environment. Before any decisions are made regarding human changes to the natural order of things, I feel that there must be thorough analysis of the area, including all flora and fauna.

I would request that a complete accounting of such an environmental study in regards to the health and condition of the forest and all the wildlife, as well as the domestic cattle, be published. Also, the projection of the effect that your proposed plan will have on the "flora and fauna".

I have followed the work of the Heber Wild Horse Freedom Preservation Alliance and admire them for providing support for the wildlife in the forest, especially the supplying of water troughs where all wildlife share this necessity.
