Title:

Comments: Please give the Tonto National Forest the strongest protections possible. It is the home of 19 threatened and endangered species and 50 species that are of conservation concern. It is up to us to save the species that are threatened and endangered, and the strongest protections on the Tonto National Forest is one way to do this.

Also, please designate all Inventoried Roadless Areas as non-motorized; manage Recommended Wilderness as true wilderness so that these areas are preserved for future designation; include an objective that removes all unnecessary roads over the life of the forest plan; and establish standards that really protect fish and wildlife and restores and connects their habitat.
