Comments: I was a lifetime resident of Heber growing up. I have seen these wild horses my whole life as I am an avid outdoorsman. The horses at times have been a little erratic and scary in my personal experiences. My biggest concern however is more for the horses. I have heard tales and stories of people shooting the horses, injuring the horses and it being out of frustration for the area they are now consuming that has been a thriving wildlife area for generations. I think there removal and implantation somewhere else would be most beneficial.
