Comments: I have spent most my life in the Show low area. I spent countless days between pinedale and heber over 37 years hunting, camping, cutting firewood there and it's sad that now everytime I go into this area I have to deal with feral horses. I have recently even come across the rez fence cut and seen where feral horses were pushed across, this was actually on the road between hwy 60 and wagon wheel. It's sad to me that so many people have abandoned pets and reservation mismanagement had led to a problem like this on public land I highly value. I believe if it was a state agency, like game and fish this problem would of been properly managed a decade ago and we wouldnt have this problem now. I'd love to see this herd culled down to a level where they are actually hard to find, not where seeing a hundred on an afternoon drive is normal. I dont see this any different than people dropping off stray cats and dogs in a neighborhood where it is federally illegal to kill them, and animal control isn't allowed to help.
