Comments: I request a copy of the TNF Riparian plan, that was referenced at Forest Planning meeting on February 25, 2020. i am unaware there is an updated plan from the failed one from years ago using Northern US models and trying to apply it to the South West. IF a Riparian Plan is not fully developed i respectfully request to be involved in the process and also suggest collaboration with the U of A and Rocky Mountain Research Station to develop useful tools in developing a monitoring protocol that specifically addresses the nature of our arid and flashy creeks and washes, where natural degradation is cyclical and unavoidable.
