Comments: Dear Tonto National Forest Supervisor, I would like to have laws to protect the beautiful cherished Salt River horses to stay in their habitat that they have been in for many historic years. I would like to see no conflicts that compromise their habitat and keep them protected. Please stop any detrimental impacts to the horses or habitat. Especially any actions under NEPA need to be publically disclosed such as herbicide use, fencing maintenance and construction. The forest service shall provide 30 day notice for any activity that may impact the Salt River Horses or habitat areas. Thank you
