Comments: The beautiful Tonto National Forest must be granted the highest possible levels of protection and preservation to safeguard the 9 threatened and endangered species and 50 species of conservation concern that it is home to. The revised plan should include designating all Inventoried Roadless Areas as non-motorized, managing recommended wilderness areas as true wilderness in order to preserve their chances for future designation, removing all unnecessary roads as soon as possible, and establishing high standards that will truly protect fish and wildlife and restore and reconnect their habitat. It is crucial that this priceless ecosystem is treated with utmost respect and returned to its natural state. Please strengthen protections for the Tonto for the well-being of its inhabitants and visitors for years to come.
