Comments: This project likens many others are misleading. Using the term "restoration" to gain traction is getting old and obviously just a trick to get funding and support. Please use our funds in productive ways that actually protect existing habitat and recreation. "Restoring" an abandoned gravel pit does. It seem like a good use of funds.

I believe this projects agenda is also targeting blocking certain forms of recreation that have used this area for many years. Using funds to continually block usage for everyone is unacceptable.
