Comments: Thank you in advance for accepting and considering my concerns about the horses currently on the Heber Territory. After careful consideration and research, it seems quite evident that should be no defining boundary fence for the Heber Territory and that it is in their best interests to continue to ingress and egress from the boundaries of the Heber Territory onto adjacent US Forest Service lands on the Black Mesa Ranger District (BMRD). There doesn't appear to be any factual research that would warrant there are an excess by law of these horses. It is also important that you know that many citizens do not support giving birth control (PZP). Many studies have been conducted by veterinarians throughout the country that yielded the data that PZP is an endocrine disrupter and causes permanent sterility within four years and not seven as stated by the drug producers. Not to mention that this method is not in compliance with the law.

Wild horses have earned the right "right" to their territory whereas livestock have only a "privilege." Please remember that this country was developed on the backs of horses and that we all owe them a profound debt of gratitude to keep them alive, thriving and as free as possible. It is the right thing to do. Thank you again for your serious consideration of the matter.
