Title:
Comments: 1. Please provide to the public the information that was used to determine the Heber Wild Horse Territory.

2. Please do NOT even consider cruel ovarietomies. Please do not consider any birth control at this point that would hurt them from being genetically diverse.

3. Please provide a detailed plan on how to pursue investigations into horses that are shot, captured, or harassed. Quicker detailed investigations need to take place and we've already lost several horses to shootings.

4. Complete a thorough Environmental Analysis of the forest that includes all wild species and domestic cattle.

5. Final decisions for the Heber wild horses should be decided by a diverse committee of people, being sure to include people voicing concern for the Heber Wild Horses. NO ONE person should be able to make the decision on how these horses are managed. They are the wild horses belonging to the residents of Arizona.

Thanks for your time and caring consideration of what is best for the Heber Wild horses
