Title:

Comments: We all already know that Minturn is served by Xcel - Holy Cross Energy want to run power lines - burry them the entire way. Sidney Harrington said it peferfectly

HCE's proposal is reckless and environmentally irresponsible. The power lines must be installed 100% underground for the following reasons:

- 1.Risk of wildfire!
- 2.Electromagnetic fields health risk
- 3.Negative visual impact to recreation areas
- 4.Negative impact on wildlife
- 5.Overall diminished quality of life in Minturn

Either don't run the lines or burry them. Period

Chris Manning
