Comments: To Forest Service and all that are responsible,

I request you release any and all scientific data and reports you use in this determination.

Follow the LAW as it was written for boundaries and management of the wild horses and all wildlife in the area.

DO NOT allow any one individual to be responsible for any and all decisions that determine the fate and management of the Heber herd. That is dangerous to the wild horses and burros. Worst idea ever to give that much power to one human of indeterminate knowledge and intelligence.
