Title:

Comments: There should be no defining boundary fence for Herber Territory. These horses were on this land prior to 1971. They have a right to their territory. FS cannot remove any horses till proven "excess" Setting number of 104 horses is illegal and not in compliance with definition of "excess". Please NO PZP!! It causes permanent sterility in four years...not seven, and is also not in compliance with the law. Please refer to ISPMB for all their research on this. Please allow these beautiful creatures on the land that they have a right to. Thank you.
