Title:

Comments: Deforestation is the 2nd cause of climate change. Since the earth is experiencing great weather changes, especially hurricanes and floods it is only COMMON SENSE to delay all clear cutting...especially 'old forests' which sequester carbon. The unprecedented 'caution' being taken now to stop the spread of coronavirus in U.S. shows the 'compassion' of a nation to stop ANY unnecessary deaths. We are 'learning' that LIFE is valuable and not the economy. Please consider how this action may cause DEATHS due to climate change around the world and do NOT allow the sale of this land for lumber. Thank you
